Subject: RE: Ames Warehouse Fire ER Update

Thanks so much Jessica.

I think the county has the lead for overall response not necessarily county health department right? Certainly for any enforcement aspects I wouldn't think that would be county health?

Lora

Subject: Ames Warehouse Fire ER Update

Hi All,

Thanks again for meeting with me this morning. Here are some notes from our 10:00 meeting that I thought would be applicable to you folks:

- Water sample was collected from outfall immediately adjacent to site.
- Sample was split between ORSENCO and WV DEP. The results we saw were from ORSENCO's split.
- We will be collecting an ash sample later this week which will be analyzed for pesticides/herbicides as well as a slew of other analyses. Maybe we can get more info from this.
- No air monitoring or sampling was conducted for pesticides/herbicides while fire was in progress.

-Confirmed County Health Dept has lead so no need for enforcement actions for this matter by EPA at this time. OSCs involved with response or local folks may reach out later.

Hopefully we see something of value in the ash sample we collect. Let me know if you have any questions or concerns.

Jessica Duffy
